Paradigm Initiates a Program to Provide Free Software to Independent Consultants

The VIP Consultant Program will give independent consultants the ability to use Paradigm software to help promote advanced science solutions in the mid-market

(HOUSTON: February 24, 2014) Paradigm® (www.pdgm.com) announced today that it has launched the Paradigm VIP Consultant Program (www.pdgm.com/vip) aimed at providing individual oil and gas consultants around the world with access to Paradigm software and training. The consultants selected for the program will receive a one-year renewable lease for Paradigm software, unlimited access to Paradigm Online University training courses, and early access to 'beta' software.

Participants in the Paradigm VIP Consultant Program will also work alongside Paradigm to promote the value of geophysical solutions that utilize advanced science across the full range of G&G disciplines. They will provide an independent voice for the worldwide application of these solutions by authoring technical papers and white papers, securing customer testimonials, jointly testing Paradigm solutions and participating in other marketing efforts.

"The Paradigm application suite integrates advanced science leadership in geophysics, petrophysics, and geology, as well as reservoir and drilling engineering," said Indy Chakrabarti, senior vice president of Strategy and Commercialization at Paradigm. "By providing cost-free access to Paradigm software, our network of influential industry experts will gain valuable hands-on experience with our solutions. This will both support their role as leading professionals in their field and further industry understanding of our advanced geophysical solutions."

A qualification form is available on the [Paradigm website](http://www.pdgm.com) for industry consultant organizations that are interested in joining the Paradigm VIP Consultant Program or would like additional information.

For more information on Paradigm products and services, visit www.pdgm.com or email info@pdgm.com.

About Paradigm®
