

Tuesday June 2	
10:30 AM	<b>Solving Velocity Challenges</b> Enriched velocity model updating: New flexible 3D model-based approach for reduced velocity model non-uniqueness Featured technology: Explorer™
11:00 AM	<b>Tackling Complex Reservoirs</b> Accurately pick and correlate well markers, utilizing real-time data from high angle and horizontal wells Featured technologies: Geolog®, Geolog Correlator, Geolog Geosteer®
11:30 AM	<b>HD Interpretation in One Scalable Platform</b> More than 'good enough': User-friendly, efficient and accurate structural delineation of a large multi-survey dataset Featured technology: SeisEarth®
12:00 Noon	<b>HD Interpretation in One Scalable Platform</b> Advanced stratigraphic investigation: Empowering interpretation with QSI Featured technologies: SeisEarth®, QSI-RFP
12:30 PM	<b>Lunch &amp; Learn: Tackling Complex Reservoirs</b> Seismic facies classification scenarios: From waveform to rock type Featured technology: Stratimagic®
1:30 PM	<b>Russian Hour</b> 1. Превращаем данные в знания Константин Смирнов, ПетроТрейс Глобал 2. Подавление регулярных помех и кратных волн в процессе полно-азимутальной угловой глубинной миграции: На примерах использования технологии в различных сейсмогеологических условиях (СНГ) 3. Примеры использования дифракционных волн с целью обнаружения разломов, трещин, рифов и других геологических объектов (СНГ) Александр Иноземцев, Paradigm Москва Featured technology: EarthStudy 360®
2:30 PM	<b>Tackling Complex Reservoirs</b> Handling a highly complex geologic environment: Challenge your reservoir modeling technology! Featured technology: SKUA-GOCAD™
3:00 PM	<b>Tackling Complex Reservoirs</b> Determine stress and fractures from seismic imaging for HD delineation of sweet spots Featured technology: EarthStudy 360®

3:30 PM	<b>Tackling Complex Reservoirs</b> Accurate fracture reservoir models combining fracture probability volumes and fracture determination at the wellbore Featured technologies: SKUA-GOCAD™, Geolog®
4:00 PM	<b>Tackling Complex Reservoirs</b> Combine Seismic & Well Data for Better Reservoir Characterization through an Integrated Field Development Platform Featured technology: Geolog®
4:30 PM	<b>Solving Velocity Challenges</b> Increase confidence: Illumination as an interpreter's tool to validate seismic in a complex environment Featured technology: Full-azimuth Illumination
5:00 PM	<b>Tackling Complex Reservoirs</b> Seismic facies classification scenarios: From waveform to rock type Featured technology: Stratimagic®

### Wednesday June 3

10:30 AM	<b>Tackling Complex Reservoirs</b> Accurately pick and correlate well markers, utilizing real-time data from high angle and horizontal wells Featured technologies: Geolog®, Geolog Correlator, Geolog Geosteer®
11:00 AM	<b>Solving Velocity Challenges</b> Enriched velocity model updating: New flexible 3D model-based approach for reduced velocity model non-uniqueness Featured technology: Explorer™
11:30 AM	<b>Customer Case Study: Geologically Consistent PSDM - Case study of the Pil and Bue discoveries in the Norwegian Sea</b> Alexander Sakharov, VNG Norge AS Featured technology: GeoDepth®
12:00 Noon	<b>Tackling Complex Reservoirs</b> Accurate fracture reservoir models combining fracture probability volumes and fracture determination at the wellbore Featured technologies: SKUA-GOCAD™, Geolog®
12:30 PM	<b>Tackling Complex Reservoirs</b> Seismic facies classification scenarios: From waveform to rock type Featured technology: Stratimagic®

1:00 PM	<b>Lunch &amp; Learn: Customer Case Study</b> Reservoir quality prediction in pre-salt carbonates: An integrated workflow from seismic to fluid distribution <i>Mafalda Lopes, Maria Olho Azul, GALP Energia</i> Featured technologies: SKUA-GOCAD™
2:00 PM	<b>Solving Velocity Challenges</b> Increase confidence: Illumination as an interpreter's tool to validate seismic in a complex environment Featured technology: Full-azimuth Illumination
2:30 PM	<b>HD Interpretation in One Scalable Platform</b> More than 'good enough': User-friendly, efficient and accurate structural delineation of a large multi-survey dataset Featured technology: SeisEarth®
3:00 PM	<b>HD Interpretation in One Scalable Platform</b> Advanced stratigraphic investigation: Empowering interpretation with QSI Featured technologies: SeisEarth®, QSI-RFP
3:30 PM	<b>Tackling Complex Reservoirs</b> Combine Seismic & Well Data for Better Reservoir Characterization through an Integrated Field Development Platform Featured technology: Geolog®
4:00 PM	<b>Tackling Complex Reservoirs</b> Handling a highly complex geologic environment: Challenge your reservoir modeling technology! Featured technology: SKUA-GOCAD™
4:30 PM	<b>Solving Velocity Challenges</b> Precision depthing for the interpreter: Velocity modeling & depth to depth calibration Featured technologies: Explorer,™ SeisEarth®
5:00 PM	<b>Tackling Complex Reservoirs</b> Determine stress and fractures from seismic imaging for HD delineation of sweet spots Featured technology: EarthStudy 360®

### Thursday June 4

10:30 AM	<b>Tackling Complex Reservoirs</b> Seismic facies classification scenarios: From waveform to rock type Featured technology: Stratimagic®
11:00 AM	<b>Tackling Complex Reservoirs</b> Combine Seismic & Well Data for Better Reservoir Characterization through an Integrated Field Development Platform Featured technology: Geolog®

11:30 AM	<b>Tackling Complex Reservoirs</b> Handling a highly complex geologic environment: Challenge your reservoir modeling technology! Featured technology: SKUA-GOCAD™
12:00 Noon	<b>Tackling Complex Reservoirs</b> Determine stress and fractures from seismic imaging for HD delineation of sweet spots Featured technology: EarthStudy 360®
12:30 PM	<b>Tackling Complex Reservoirs</b> Accurate fracture reservoir models combining fracture probability volumes and fracture determination at the wellbore Featured technologies: SKUA-GOCAD™, Geolog®
1:00 PM	<b>Lunch &amp; Learn: Solving Velocity Challenges</b> Precision depthing for the interpreter: Velocity modeling & depth to depth calibration Featured technologies: Explorer,™ SeisEarth®
2:00 PM	<b>Solving Velocity Challenges</b> Enriched velocity model updating: New flexible 3D model-based approach for reduced velocity model non-uniqueness Featured technology: Explorer™
2:30 PM	<b>Solving Velocity Challenges</b> Increase confidence: Illumination as an interpreter's tool to validate seismic in a complex environment Featured technology: Full-azimuth Illumination
3:00 PM	<b>Tackling Complex Reservoirs</b> Accurately pick and correlate well markers, utilizing real-time data from high angle and horizontal wells Featured technologies: Geolog®, Geolog Correlator, Geolog Geosteer®
3:30 PM	<b>HD Interpretation in One Scalable Platform</b> More than 'good enough': User-friendly, efficient and accurate structural delineation of a large multi-survey dataset Featured technology: SeisEarth®
4:00 PM	<b>HD Interpretation in One Scalable Platform</b> Advanced stratigraphic investigation: Empowering interpretation with QSI Featured technologies: SeisEarth®, QSI-RFP
