Paradigm Extends the Reach of its Well Planning and Drilling Engineering Offering with Sysdrill 10.5

Latest release adds customer-driven enhancements

(HOUSTON: January 20, 2016) Paradigm® (www.pdgm.com) today announced the release of [Paradigm Sysdrill® 10.5](#), the latest version of its integrated suite of well planning and drilling engineering applications. This upgrade represents the continued Paradigm commitment to its user base by offering numerous customer-driven enhancements in all areas of the application.

New features in this release include updated modelling, including HDGM for declination calculation and ISCWSA Rev 4 error models. Supporting growing global demand, the Sysdrill 10.5 application is now fully translated into both Russian and Chinese languages.

“Building on the Sysdrill 10 solution suite, the 10.5 release allows drilling engineers to perform advanced engineering analysis with minimum effort,

Engineered well with geological model displayed in Paradigm Sysdrill.

in a single, integrated application, thus saving valuable time,” said Simon Verity, product manager for Paradigm well planning and drilling solutions.
