

FOR IMMEDIATE RELEASE

Paradigm Named a Winner in 2009 Edison Best New Product Awards

Paradigm EarthStudy 360 wins Bronze in the Energy & Sustainability category for 2009 Edison Best New Product Awards

(AMSTERDAM: April 6, 2009) Paradigm™ (www.pdgm.com), a leading provider of enterprise software solutions to the global oil and natural gas exploration and production (E&P) industry, announced today that Paradigm EarthStudy 360™, its revolutionary seismic imaging and interpretation technology for subsurface hydrocarbon exploration and development, has won bronze in the Energy & Sustainability category for the 2009 Edison Best New Product Awards™. Established in 1987, the EDISON AWARDS™ have honored some of the most innovative companies, business leaders and products in corporate America.

"Innovative, collaborative, passionate, and persistent are just a few of the many characteristics that describe the finalists for the 2009 Edison Best New Product Awards," stated Sarah Miller Caldicott, great grandniece of Thomas Edison, co-author of *Innovate Like Edison*, and Chairperson of the Edison Awards Steering Committee. "As a bronze winner in our 2009 Edison Awards, Paradigm EarthStudy 360 represented a standout technology in the Energy & Sustainability category."

EarthStudy 360 is a breakthrough solution for generating full azimuth (360) images of the subsurface from seismic data recordings, providing geoscientists with new data structures and visualizations that can indicate the presence of undiscovered hydrocarbon reservoirs or better understanding of a mature oil field. The method is applicable to the most challenging geologic environments in the subsurface, including subsalt exploration in the deep waters of the Gulf of Mexico. EarthStudy 360 technology is designed to give oil companies more confidence in using seismic images to make safe and successful drilling decisions with minimum environmental damage.

"Paradigm is pleased to be awarded the 2009 bronze Edison for Paradigm EarthStudy 360," said Zvi Koren, Paradigm inventor, research fellow, and chief geophysicist. "As a leader in subsurface imaging solutions, we continually strive to provide technologies that break down barriers in traditional seismic methodologies and deliver more informative results to geoscientists and oil finders."

The Edison Best New Product Awards, sponsored this year by Google, The Nielsen Company, Steelcase and Capitol Media, identify new products and services that excel in marketplace innovation, marketplace success, technological innovation, market structure innovation, and societal impact. These criteria align with Edison's own innovation best practices, called the Five Competencies of Innovation™.

About Paradigm™

Paradigm B.V. (www.pdgm.com) is an industry leader in digital subsurface asset management, serving oil and gas companies worldwide. Paradigm technology solutions for seismic processing and imaging, interpretation and modeling, reservoir characterization and petrophysics, and well planning and drilling operate in an open environment to accelerate results. Paradigm has a global network of sales, consulting and support.

The following are trademarks or registered trademarks of Paradigm B.V. or of its affiliates (collectively, "Paradigm"): Paradigm™, Paradigm logo and/or other Paradigm products referenced herein. About The Edison Awards:

The Edison Best New Products Award™ recognizes the persistence and excellence Thomas Edison personified, qualities which have allowed America to remain in the forefront of innovation, creativity, and ingenuity in the global economy. The Edison Achievement Award™ honors business leaders who have displayed the persistence, collaboration, and creativity necessary to promote successful innovation in their organizations. Strategic implementation partners for the 2009 awards program include the Thomas Edison Papers at Rutgers University, the Marketing Executives Networking Group (MENG) and The MIT/Stanford Venture Lab (VLAB).
